

## “Dream Big” Honored with Three Top GSCA Achievement Awards including Best Film of the Year

Documentary also takes home Best Visual Effects and Best Marketing Campaign by a Distributor

October 5, 2017, Laguna Beach, CA—***Dream Big: Engineering Our World*** took home top honors at the Giant Screen Cinema Association's 2017 Achievement Awards, winning three awards for **Best Film of the Year**, **Short Subject**, **Best Visual Effects** and **Best Marketing Campaign by a Distributor**. The film was also honored in connection with the Carnegie Science Center's award for **Best Educational Program** for ***Dream Big***.

"We are honored with the GSCA's recognition of ***Dream Big*** and its positive impact on STEM education," said director **Greg MacGillivray**. "Parents and teachers are looking for ways to turn kids on to science and engineering, and ***Dream Big*** is making these subjects more accessible to kids and inspiring them to dream big for the future. We share these awards with the thousands of volunteer engineers around the world who have helped bring ***Dream Big*** to the attention of global audiences."

Narrated by Jeff Bridges, ***Dream Big*** showcases engineering marvels big and small, from the Great Wall of China and the world's tallest buildings to underwater robots, solar cars and smart sustainable cities.

In addition to the film's success in inspiring the next generation of dreamers, the film has been a box office favorite. Over 1 million people have seen the film in giant screen theatres in the first 6 months since its opening in February.

The film was produced in partnership with the American Society of Civil Engineers and presented by Bechtel.

"***Dream Big*** is living up to its name," said ASCE Executive Director **Tom Smith**. "It is unlike anything ASCE and its partners have ever done before. We're delighted to see the film reaching a new and broader audience, with a global impact."

***Dream Big*** premiered at the Smithsonian's National Air and Space Museum on February 15, and will play in more than 75 museums and science centers in the U.S. and around the world.
